

Student Safety Audit

Linewize is now offering a no-cost Student Safety Audit

What is a Student Safety Audit?

A Student Safety Audit (SSA) enables you to deploy Linewize Monitor in your district for 30 days at no cost.

Over the 30-day period, we will assess your students' online behavior for risks and alert you by phone to any students we believe are in danger.

When the audit is complete, you will gain a robust report including risk profiles and recommendations for implementing a holistic student safety program at your district.

Linewize Monitor alerts you to risk categories including:

- ✓ Self-harm, suicide, and depression
- ✓ School violence
- ✓ Bullying and cyberbullying
- ✓ Grooming
- ✓ Drug use
- ✓ Sexual content

How it works

It's simple and straightforward.

1. Online activity assessed

Linewize Monitor collects data online and offline and on any network.

2. At-risk words or behaviors trigger AI alerts

Sophisticated AI technology determines whether online activity should be flagged. If activity is of concern, Monitor will collect a screenshot from the client device.

3. Alerts are assessed

Alerts are assessed to determine whether the incident is high-risk or low-risk.

- Low-risk alerts are stored in your digital monitoring dashboard.
- High-risk alerts are assessed by human moderators and reported directly to the school.

4. All incidents are stored in digital monitoring dashboard automatically

View all flagged student activity directly in your dashboard at any time.

5. Audit report is delivered to your district

After 30 days, a comprehensive report is compiled and reviewed with your district leadership.
